Introduction

Your astrological horoscope (natal chart) at birth is an important key to your personality and character, but your natal chart is not the last word about you. As time moves on after the moment of your birth, the Sun, Moon, and planets continue to circle through the heavens forming ever-changing kaleidoscopic patterns in relation to your own birth chart, bringing out or obscuring this or that part of you.

It can be useful to know how these ongoing planetary patterns relate to your life, and that is what this report is about. Here we calculate the primary astrological changes in your chart and interpret them so that you can see at a glance what is happening at any given time. Your events are arranged and interpreted chronologically, by well-known astrologer Michael Erlewine, and each event includes date and time, keywords, astrological indicator, and an astro-tarot card. We hope you enjoy your forecast.

In the tradition of astrology the planets have always been interpreted separately from the Sun and the Moon, which are called "The Lights," and for good reason. They literally light up our life and their combined interaction describes the essence of what is happening to us at any given time. Although called "The Moon Report," any mention of the Moon automatically involves the Sun, and of course, our Earth. These three, the Sun, Moon, and Earth, in their endless interaction are perhaps the single most important factor to observe in astrology.

The ever-changing relationship in the sky between the Sun and the Moon is perhaps most obvious at the Full Moon, but as we know, it is going on all the time. This report tracks the Sun-Moon relationship as it relates to your particular natal horoscope and birth chart, detailing all of the major events that take place in the current month for a specific life area and planet.

The Moon has always represented the 'mother', meaning anything that nurtures or cares for us, our support system, however that is made up. It also indicates our emotional makeup, how we feel about things, and the nostalgia of the past - where we came from.

On the other hand, the Sun represents the 'father' principle and the future, where we are heading toward and, to some degree, the means we have to get there. The Sun burns brightly, while the Moon is cool and comforting. The two together mark the endless play between the past and the future, and we here on Earth, are caught right in the middle, that is: the present.

About the Transformation Forecast

Your Pluto Forecast

Pluto stands for true transformation, experiences that touch us so deeply, make us feel so vulnerable, that we are somehow changed forever. This planet is also not noted for being gentle and subtle, but rather sudden and dramatic. A Pluto experience is seldom forgotten and often marks a pivot or turning point in our lives.

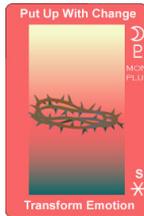

This forecast is about how the planet Pluto figures in your natal chart and what it portends for the immediate future. In this calendar will be marked the days and times when we can work with the force of changes, as well as those when we will be better off waiting for another time. We hope you enjoy it.

Pluto in your Natal Chart

Before we present your Pluto forecast for the coming months, let's review how the planet Pluto is configured in your natal or birth chart. What follows is an interpretation of Pluto at your birth to the Sun, Moon, and other planets. It should help to give you a general idea of how you related to matters of vulnerability and transformation. Here goes:

Pluto
Sextile
Moon
(Waxing)

Put Up with Change

A little burst of energy usually gives you a wee bit of latitude for dealing with what could be some deep-seated emotional issues or just plain eruptions from the past. Best to embrace all of these, even if it means humbling yourself, for the sake of bringing through the best that can be made of this experience. You can be too sensitive, perhaps with feelings of vulnerability.

Pluto
Square
Sun
(Waxing)

Signs of Change

You tend to push things to a turning point, where change is finally manifest, and in a clear, and possibly somewhat intense, form. You like to make your point, one that clearly alters the status quo and can be seen.

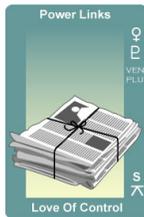

Pluto
Square
Mercury
(Waxing)

A Sign of Change

You may come across too strongly, or touch on sensitive subjects with words, writing, speaking, and are probably very persuasive. Whatever the case, your point is clear and you probably make quite an impression.

Pluto
Quincunx
Venus
(Waxing)

Power Links

You can take advantage of times to use your more compulsive side to finish up some project already in the works or half done. You can push past obstacles (and there are some), and get into the fine details of completing this work.

Pluto
Semisextile
Mars
(Waxing)

Plans to Control

You have an natural drive to get to the bottom of something and to gain control, and perhaps to make changes, and this is important enough to you to make careful plans in this regard.

Pluto
Quincunx
Jupiter
(Waxing)

Networking

Access to power, the way or path to power (career) is the controlling issue here. Your skills should be directed at building infrastructure, finishing something up that is already in motion, as opposed to starting anything new.

Pluto
Semisextile
Saturn
(Waxing)

Plans for Change

Your attempts or plans to contain or control deep inner feelings are nothing, if not organized, and you definitely have a method in your madness, a very detailed plan.

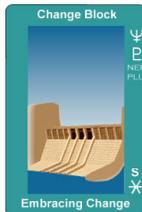

Pluto
Semisquare
Uranus
(Waning)

Deep Impact

You find yourself involved in a careful examination and scrutiny of depth psychology, deep and penetrating insights, with an eye to what is superfluous. You keep to what is simple, and to you that is profound.

Pluto
Sextile
Neptune
(Waxing)

Change Blocked

You may have experiences of deep acceptance, of a more spiritual nature, that dawn on you, but these can meet with all kinds of minor resistance that prevents or delays it from really getting across and being understood. Working through the resistance furthers.

Your Pluto Forecast

Now that we have reviewed how Pluto is configured at your birth, let's get to the heart of this report, a forecast as to how Pluto (matters of change and transformation) will play out in the coming months. These are the actual transits that will occur between the Sun, Moon, and other planets in relations to Pluto, laid out in an easy-to-read calendar-like format.

Each event will be described by date, day of the week, and include an interpretation written by astrologer Michael Erlewine about how that event might appear in your life. This includes a brief keyword description, when you can expect this event to be exact, the astrological jargon professional astrologers can read, and even a little tarot-like card image to jump-start your imagination.

By reading through the activity of Pluto forecast in the coming months, you basically have a roadmap of how this planet will manifest its nature and play out in your life. We hope you enjoy your forecast.

Efforts to Change

Sun Semisquare Pluto (Wax) Transit to Transit

Here you may have a struggle between the forces of change and transformation, and simple mundane obstacles to moving forward. The tendency may be to blow what irritates us out of the water with a burst of intense power, but a better use would be to negotiate their demands, pay them their dues, and move around them. This is a time to move forward, however, not go back.
